Introduction

This report highlights the University of Business and Technology's (UBT) dedication to Sustainable Development Goal 9 (SDG09): Industry, Innovation, and Infrastructure, as part of its engagement with the Times Higher Education (THE) Impact Rankings. It demonstrates UBT's efforts to promote sustainable industrial practices, technological innovation, and resilient infrastructure through its academic and research contributions.
The report outlines the alignment of 196 courses with SDG09, focusing on empowering students with the knowledge and skills to advance sustainable industrial growth, foster innovation, and develop resilient infrastructure systems. Additionally, it showcases 91 research projects that address challenges in sustainable infrastructure, industry-academia collaboration, and technological advancement to enhance industrial productivity and sustainability.

Research's Alignment with The SDG

UBT has conducted 91 research projects aligned with SDG09. These research initiatives include:

- Studies on the development of sustainable and resilient infrastructure.
- Research on fostering innovation through industry-academia collaborations.
- Investigations into the role of technology in enhancing industrial productivity and sustainability.

The research projects reflect UBT's commitment to advancing industry innovation and improving infrastructure systems globally.
